

**Quick guide to using the Athena Series CD Duplicator standalone series.**

Congratulations. You've just purchased the Athena Series CD Duplicator standalone system. It comes with an easy-to-use operating control panel, which includes a LCD screen and 4 push buttons. All operating messages and information including function list, instructions, operating status, or error message(s) will display in real time on the screen.

Follow these steps for easy set up:

1. First, remove the duplicator and extension cord from the package.
2. Plug the extension cord into an electrical outlet.
3. Hit the power button at the front panel on the lower right-hand corner.
4. Open the top disc source tray by pushing its button.
5. Place the source disc, the CD disc from which you want to copy, into the top disc drive.
6. Close that disc tray.
7. You can begin duplicating your discs. To do so, place the blank CD±Rs in the drives. You're now ready to duplicate your discs.
